

Proposal to Revisit and Revise Tier 1 Guidance and Requirements

- n Several line and support organizations have identified the need to revisit and revise Tier 1 requirements and guidance (ESH Standard 1.2.0) Examples include:
 - Greater flexibility in schedules
 - Improve integration of ESH disciplines (ensure satisfaction of EMS requirements)
 - Clarification of corrective/preventive action management requirements
- n There is also concern that many organizations have adopted and improved internal processes that are functioning. We need to ensure revisions do not significantly impact these process.
- n Proposed schedule will be to update the ESH Standard to a Subject area by September 2002.
 - This schedule is believed to be balanced with other commitments
 - It could be done quicker if there is consensus on need
